

DROUGHT WARNING

RAINY RIVER BASIN

MN Department of Natural Resources advises that the Rainy River Basin watershed has moved into the **DROUGHT WARNING RESPONSE PHASE.**

The best way to prepare for a drought
IS TO CONSERVE WATER.

Make conserving water a part of your daily life.

SIGNIFICANT DEMAND REDUCTION IS ACHIEVABLE BY:

restricting non-essential outdoor water use, especially watering lawns

power washing buildings

washing cars

filling swimming pools

Never pour water down the drain when there may be another use for it. For example, use it to water your indoor plants or garden.

Fix dripping faucets by replacing washers. One drop per second wastes 2,700 gallons of water a year.

Check all plumbing for leaks and have any leaks repaired by a plumber.

Every Drop Counts.

SAVE WATER. PROTECT OUR COMMUNITY.
